Re: League City Supports Alternative 3

Dear Mr. Miller:

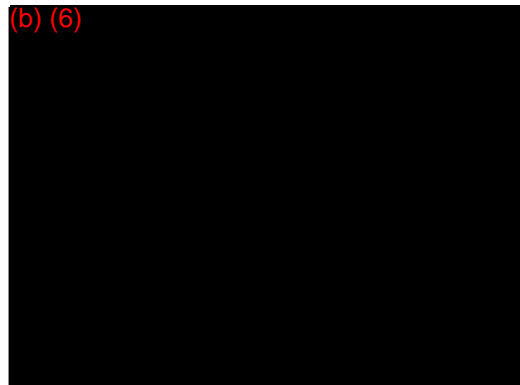

I have heard about the San Jacinto River Waste Pits from neighbors and media. I have also seen that the EPA is considering options for remediating that Superfund site.

Alternative 3, placing a permanent cap over the hazardous waste, is by far the best option and one that keeps us safe. I am worried about what would happen if there is a nearly two-year period of time for removal where nearby residents risk exposure, especially in the case of flooding.

Please quickly place a permanent cap on these materials and protect all of us in League City, as well as all residents in Harris and Galveston Counties.

Sincerely,

(b) (6)
